Description

Vintage Soviet Zorki 1 35mm rangefinder camera with an attached collapsible Industar-22 50mm f/3.5 lens.

Identification

- The camera top plate is marked "" (Zorki) and bears the KMZ factory emblem.
- Camera serial number: 479360.
- The front lens ring is marked Industar-22 1:3.5 F=50mm in Cyrillic.
- The lens barrel also carries "Elmar 5cm" and "Ernst Leitz GmbH Wetzlar Germany" markings. These markings are noted for accuracy; this is being listed as a Zorki camera with an Industar-22 lens, not as a Leica camera or Leica lens.

Condition

- Tested and functional, as reported.
- Considerable cosmetic wear consistent with age and use, including finish wear, scratches, marks, oxidation/discoloration, and worn or missing areas of the black body covering.
- Lens glass has visible age-related marks/condition in the photographs and has not been given a formal optical grading.
- Please examine all photographs closely for the exact cosmetic condition.

Included

- Zorki 1 camera body
- Attached collapsible Industar-22 50mm f/3.5 lens

No case, caps, film, or additional accessories are shown or included.

Item specifics

Brand	Zorki
Model	Zorki 1

How this listing was generated

The listing above was written by Capture from the photos, using the inputs below.

Generation guidance

Generation guidance is optional free text the user adds when capturing an item - anything the photos alone cannot show, such as provenance, known faults, included accessories or what to emphasise. Capture passes it to the AI as context alongside the photos, so it directly informs the title, description and item specifics.

tested, functional

Questions at capture

As soon as the first photo is taken, Capture recognises what kind of item it is and immediately shows a short set of relevant questions - the details buyers care about for that type of item and that are easiest to confirm while the item is still in hand, such as size, material or what is included. The user answers these on the spot, and the answers are passed to the AI as confirmed facts alongside the photos.

1. Has the camera been tested?

Select the most accurate status.

working

2. Is the lens included and attached?

Yes

Clarifying questions from Capture

While writing the listing, Capture reviews the photos, guidance and answers above. Where it still wants further clarification on a detail it cannot determine confidently - a brand, an exact model, a measurement - it asks the user directly rather than guessing. The answers are used as additional context for the listing. Skipped questions are left to the AI's own judgement.

Capture did not need any further clarification for this item.
